- Networking and team activities

After a successful Graduate Academy in 2015, places are now available for this year's programme!

**24th - 27th October 2016,
Aston University, Birmingham**

There is no spell that magically transforms a university student into a consultant. For this reason, the training and development you receive as a graduate is a crucial part of equipping you with the basic tools to make your first steps in the industry.

This year's Graduate Academy will be run over the course of four days at Aston University in Birmingham. The Academy aims to provide you with the springboard you need for your first year of technical work and add direction and context to your initial steps in your career.

Introduced by experts...

With a wealth of technical knowledge and hands-on industry experience, our own in-house experts will introduce you to the UK nuclear industry, its history, current practices and regulations, alongside pragmatic tutoring in business skills and client interaction.

Designed to kick-start your career, the Academy will give you a taste of the industry today, and how to become a great consultant, with a thirst for knowledge and a keen eye for business and client satisfaction.
