

Independent Peer Review

AREVA RMC's highly experienced team has hands-on experience of both the civil nuclear and defence sectors, and translates this experience into informed, astute and high-quality peer review for our clients. We offer comprehensive and expert peer review services across the nuclear lifecycle, our consultants are based throughout the UK in close proximity to our major clients.

We offer a proven track record of high quality, reliable and informed technical reviews

Expert Peer Review of Safety Cases

At AREVA RMC we offer detailed peer review of the full suite of safety case documentation, including safety reports, hazard analysis and design justification reports. With experience both as authors and reviewers, our teams draw on their in-depth knowledge of nuclear safety and licensing regulations, providing peer review of assurance and engineering documentation, nuclear safety cases for facilities at all stages of design, operation and decommissioning, and submissions for Licence Condition 36 to the regulators.

Working with some of the UK's major nuclear organisations, including Sellafield Ltd, AWE, DSRL Ltd, Imperial College, and RWM Ltd, amongst others, we have a proven track record of high-quality, reliable and informed technical reviews.

Technical Review of Specialist Papers

Looking beyond our safety case capabilities, we also undertake technical peer review of specialist papers, led by dedicated in-house experts, in the following areas:

- Human Factors and Ergonomics;
- Criticality;
- Shielding and Dose Assessment;
- Radiological Protection;
- Waste Management and Decommissioning;
- Radioactive Transport;

With a knowledge of their field that is second to none, our reviewers are all at Principal consultant level and above, with extensive industry and authoring experience.

Our emphasis on quality ensures the peer review process is consistent and appropriately resourced and planned

Why choose AREVA RMC?

Highly experienced teams

With over 20 in-house consultants experienced in peer review for a range of facilities and projects, our peer reviewers are respected specialists in their fields, with several having been appointed as Technical Authorities within the Company and recognised as AREVA Experts by the international AREVA Group.

We offer a wide-ranging and acknowledged peer review capability, with consultants who have previously conducted peer review for the ONR, and a range of in-depth reviews of documentation for high hazard facilities.

In-depth understanding of peer review procedure

In addition to our consultants' practical experience of peer review, members of our team have also been involved in developing corporate peer review procedures and supporting guidance notes for a number of nuclear site licensees. With an insight into the importance of a structured and streamlined approach, we optimise our capability to ensure we deliver a comprehensive peer review service to our clients.
